

Hello,

I oppose the move to eliminate the restrictions on different forms of news media being owned by the same entity. Such a move would further undermine the press obligation to keep the general public properly informed. This proposed change would seriously undermine the democratic participation of our people.

The events of September 11th might have been averted if our public had received better information from its news sources prior to that date. Deregulating the news media in such a way as is now proposed just increases the possibility of these events happening again.

Please, do not further deregulate the news media in this way.
